Notice of Dangerous Goods Requirements Update
MSDS Requirement for Ningbo Port

Dear Valued Customers,

In response to the recent incident involving Hazardous / Dangerous Goods (DG) cargo in Ningbo, CN (CNNGB), the terminal is now requiring an English and Chinese version of the Material Safety Data Sheet (MSDS) for all DG cargo loaded, discharged, transhipped, or **in transit** through Ningbo.

This change is effective immediately for cargo currently in transit and new bookings. Previously, this information was only required for cargo transshipping or destined for Ningbo.

Please be advised that cargo may be rejected if unable to comply in providing the required documentation.

This change will impact Hazardous DG cargo in transit on (not limited to) the following ONE services: PS3, PS6, AP1, CP3, PN1, PN4, EC1, EC2, and EC6.

Should you have questions, please do not hesitate to contact your local ONE representative.

Sincerely,

Ocean Network Express (North America) Inc.
