RE: ONE Equipment Return Advisory – Update

Valued Motor Carrier Partners,

On February 24, 2020 ONE distributed an advisory whereby we asked for motor carriers to hold onto equipment where possible and announced the temporary stoppage of the detention clock for equipment moving over the LA/LB gateway due to storage capacity limitations. Due to improved conditions, and an increase in storage capacity thru multiple sources, it has been determined that the need to operate under a stopped detention clock program is no longer required.

Effective March 20, 2020, ONE will restart the detention clock for all units on the street.

Please continue to monitor returnlocation.com and the various terminal websites for appointment times to return empties as space becomes available. You may also contact ONE directly at the following email address NA.EQCSOUTHWEST@ONE-Line.COM for assistance with specific challenges returning equipment.

Thank you,
ONE Management
