

ONE eBL

What is an eBL?

An electronic Bill of Lading is the same as a Master Bill of Lading, but in digital format. It presents the 3 attributes - contract of carriage, document of title and evidence of receipt.

How does it work?

Covering the bill of lading and other trade documents, the eBL product digitizes the issuance, transfer and signature activities. All parties must join the same network and the document chain is fully executed via the platform - from issuance to surrender.

How does it benefit you?

Simple

- ✓ Paperless process and less manual handling
- ✓ Online platform available for seamless access
- ✓ Simplified document chain with streamlined approach

Swift

- ✓ eBL available to our customers within minutes
- ✓ Faster document chain, within days
- ✓ Enable faster document verification for issuance, endorsement and surrender

Secure

- ✓ Mitigated risk of document fraud or loss
- ✓ BL encrypted by blockchain technology
- ✓ Secure environment with backend contact verification
